

CRUD BASIC

PHP & MYSQL

INSTRUCTION:

1. Download zip file from Google Classroom and unzip it (copy and paste in htdocs folder in xampp)
2. In project folder we folder name **database** open it you will see database name “web_a.sql” import it to phpMyAdmin
3. Write code to **CRUD student** table in database
4. HTML / CSS already provide

Noted: in partial folder just we don't want to write HTML again and again
That why we put it in header.php and footer.php and after we require it.
